SKILLS

Languages

Java, Python, TypeScript, JavaScript, C

Frameworks

Spring Boot, React.js, React Native, Node.js, Laravel

Cloud & DevOps

AWS (EC2, Lambda, CloudWatch), Terraform, Datadog

Tools

Spring Cloud Consul, Firebase, Git, Docker

EDUCATION

University of South Carolina

B.S. Computer Science

Aug 2018 – Dec 2021

GPA 3.9 · Dean's List

PROJECTS

Meet Food & Culture

React Native

Mobile app connecting users globally through food culture. Implemented Firebase auth and real-time data sync.

Yutility

TypeScript / JavaScript

Utility-bill payment and service-reporting app with multi-provider hub.

Expedition Bot

Node.js

Discord bot for scheduling events via majority reaction vote, supporting 1,000+ users across 20 servers.

WORK EXPERIENCE

P2 Software Engineer – CV User Experience

Feb 2025 – Present

Hinge Health

- Helped launch a backend service that determines whether a mobile device can reliably support camera- and motion-based features, including production infrastructure, monitoring, documentation, and security readiness.
- Delivered backend work that decoupled movement-definition logic from tightly coupled code paths, reducing rollout risk and laying the groundwork for the movement-analysis platform to scale.
- Owned key backend platform work across schema updates, movement-definition updates, and architecture cleanup, improving system maintainability and extensibility.
- Led a scheduling-logic migration to a new active-days API, coordinating contract details with a partner team and delivering the implementation on the committed sprint.

Associate Software Engineer – Investment Operations

Dec 2021 – Dec 2024

Morgan Stanley

- Orchestrated AWS resources (EC2, CloudWatch Logs, Lambda) for production deployments.
- Automated infrastructure provisioning via Terraform, implementing end-to-end infrastructure-as-code pipelines.
- Enhanced observability by integrating Datadog for logs, metrics, and APM traces.
- Developed scalable API services using Java Spring Boot.
- Modernized log-level configuration with Spring Cloud Consul for zero-downtime runtime updates.
- Designed a multi-logger service discovery system, improving incident diagnostics.

Software Engineer Intern – Investment Operations

Jun 2021 – Dec 2021

Parametric Portfolio Associates

- Built a React.js internal tool for the promotions team, increasing team productivity by 30%.
- Debugged web interfaces and shipped usability improvements to enhance customer experience.

Software Engineer Intern – Promotions Experience

Jun 2019 – Aug 2019

Wayfair

- Contributed to frontend feature development for the promotions engineering team.
